

### Example E10: Principal versus most advantageous market

Company E holds an asset that is traded in three different markets but it usually buys and sells in Market C. Information about all three markets follows.

<b>Volume (annual)</b>	30,000	12,000	6,000
<b>Trades per month</b>	30	12	10
<b>Price</b>	50	48	53
<b>Transportation costs</b>	(3)	(3)	(4)
<b>Possible fair value</b>	47	45	49
<b>Transaction costs</b>	(1)	(2)	(2)
<b>Net proceeds</b>	46	43	47

Company E's principal market is Market C, as it is the market in which the company usually buys and sells the asset.
